WE WOOD, YOU PLAY

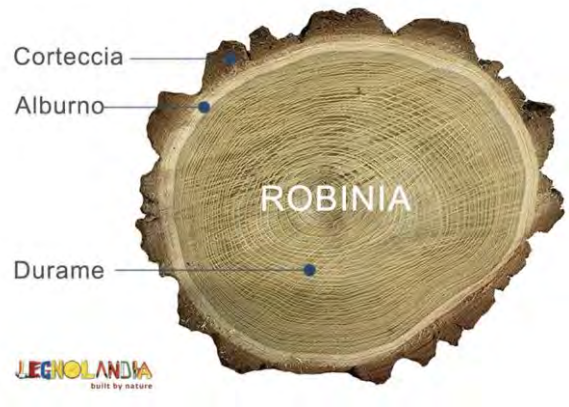
NATURAL PLAYGROUNDS IN ROBINIA WOOD

lifespan and fairy-tale design in harmony with nature

ROBINIA, A RESISTANT AND LONG LASTING WOOD

The high resistance of Robinia against plant and animal parasites is related to the heartwood (inside part) which represents approximately 80% of the trunk. The slightly twisted natural shape of the Robinia trunks gives a natural appearance and a certain rustic charm. In particular in playground equipment, Robinia wood allows a fairy-tale interpretation of children's equipment and an optimal inclusion in parks in harmony with nature.



legnolandia
WE WOOD, YOU PLAY

EXPERIENCE AT THE SERVICE OF SAFETY

Legnolandia's centenary experience in woodworking, combined with technological innovation for the utmost research in safety, allows the manufacturing of long-lasting and safe play equipment and furniture in Robinia wood. The characteristic feature of Robinia wood, with its natural bends, requires high care in calculating the free zones to avoid the trapping of children's body parts during the play. Special certified devices assist Legnolandia's master craftsmen to assemble all components and to create safe and functional plays.

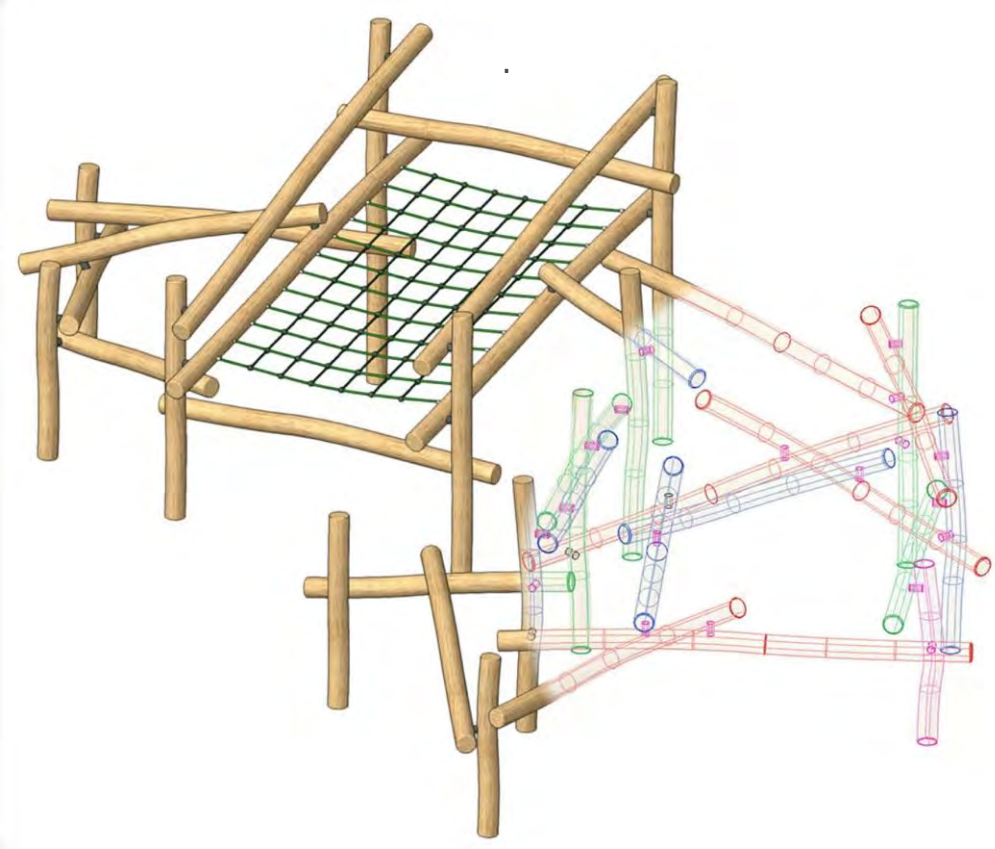
PLASTIC FREE

The products have a plastic percentage lower than 1% of their total weight.

legnolandia
WE WOOD, YOU PLAY

WE DESIGN YOUR THEMED PLAY AREA IN ROBINIA WOOD

At Legnolandia, we design and manufacture play equipment in Robinia wood according to the customer's needs, also by matching it to the "Theme" of the playground. We have a wide range of equipment: climbing structures, small houses, slides, skill tracks, sensory paths, seesaws and swings made of Italian Robinia wood (not imported).



PLAY EQUIPMENT IN ROBINIA WOOD ARE NATURAL AND SUSTAINABLE

MATERIALS:

The articles that we have proposed in this Catalogue are made of Italian Robinia wood which comes from the cleaning of the forests. That is taken in a controlled and sustainable way. The wood is debarked, stripped of the sapwood, sanded and worked by hand to create long-lasting and safe equipment.

SAFETY:

All plays are designed and manufactured according to the current **EN-1176:2019** Safety Norms for Playgrounds.

CONSTRUCTION SECTIONS

Large bearing structures:
Ø 160/200 mm
Small-medium bearing structures:
Ø 140/160 mm
Flooring and Roof beams:
45x90 mm
Flooring thickness **30 mm**
Balustrade thickness **20 mm**
Roof boards in Robinia wood and/or Larch. Hardware in stainless steelx

Wood is always on the move.
As this article has been manufactured in Robinia wood, it could even show a surface cracking in the future without any inconvenience related to the lifespan, functionality and safety.

Illustrated Sheet

Art. 011498-R ALTALENA CESTONE MINI ROBINIA

240 x 100 h 130 cm	550 x 400 cm	2-3	2 - 8	H. C. 90

Funny inclusive swing with basket, suitable for children from 2 to 8 years with any motor skills. The large basket has a diameter of 100 cm and can contain 3-4 children at the same time and is made up of a weave of colored synthetic ropes with an internal steel core. The large uprights are made of natural Robinia wood with an irregular diameter of 14 to 16 cm. The support chains are made of tight-knit stainless steel to prevent fingers from being inserted. The rotation pins are made entirely of stainless steel with self-lubricating bearings. The structure must be fixed to the ground using concrete foundations.

Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

Inclusive play:
Having fun together in the same dynamic space, this is the fundamental concept of this inclusive game. The children's hands come together and join on the swinging "nest" that can accommodate children of different ages and with

Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.

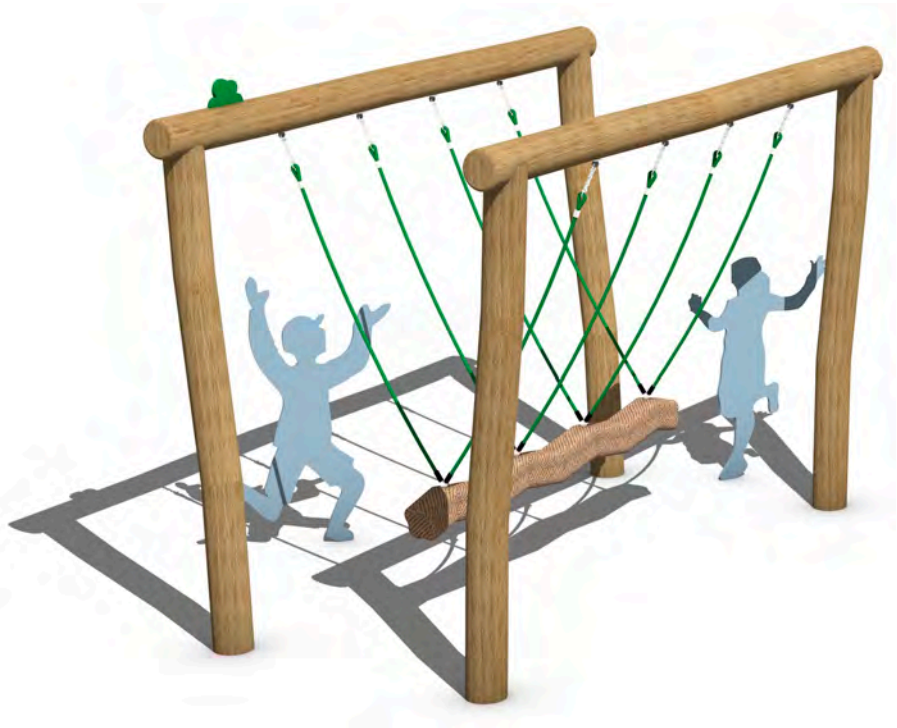
Art. 011255-R ALTALENA CANAPONE ROBINIA

191 x 350 h 242 cm	650 x 490 cm	5	3-11	H. C. 59

Unique and attractive swing for group fun.
The large swinging rope is made up of a large Ø 18 cm anti-trauma rope and is certified and guaranteed for long life outdoors and against wear. The Ø 16 mm support ropes are made of strands of colored synthetic material with an internal steel core. The large cylindrical uprights are made of Robinia wood with a smooth surface and have an average diameter of Ø 15-20 cm, offering maximum stability, durability and safety. The through bolts are embedded in the wood and equipped with a protective polyethylene cap. The structure must be fixed to the ground using concrete foundations.



Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

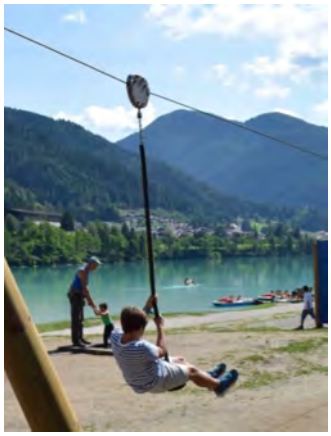
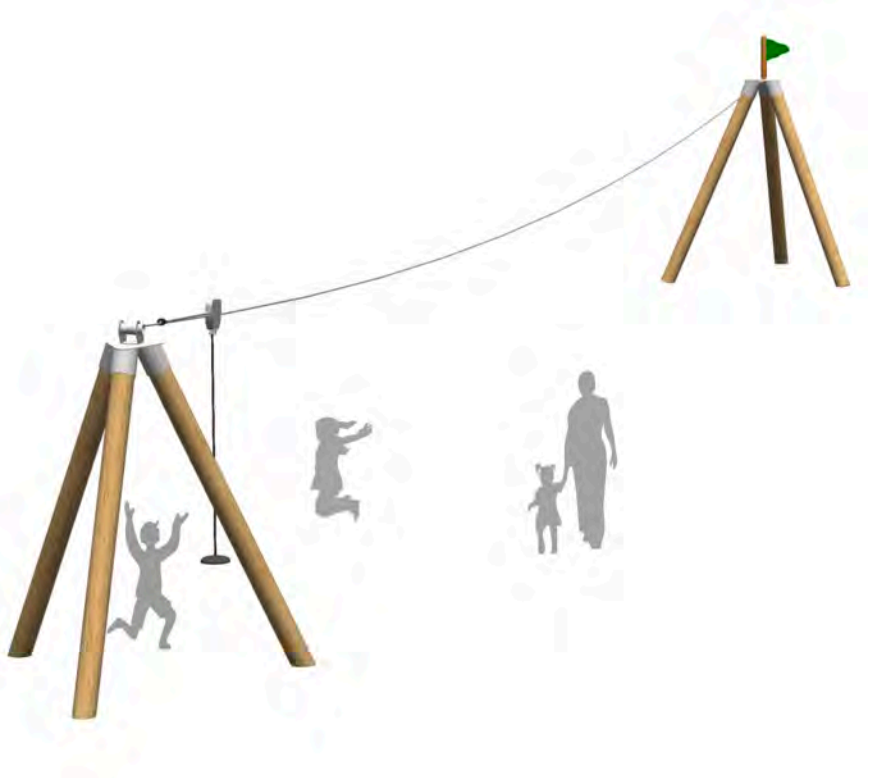
300 x 3000 h 290 cm	300 x 3000 h 290	1	5 - 12	H. C. 99

Large ropeway, very robust and funny.
The system exploits the slope of the ground (recommended height difference of approximately 100 cm), creating a path along which users slide on a rubber seat suspended from a metal rope. The seat, made of soft anti-trauma rubber with a metal core, is connected to the trolley by a chain protected by a rubber tube. The stainless steel trolley is equipped with a brake and a start and stop spring. The load-bearing rope is made of high-strength spiral steel. The Ø 200 mm section uprights are made of smooth ROBINIA wood connected with a galvanized steel bracket. The standard length of the path is 30 metres, but on request it is also available in different sizes.





Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

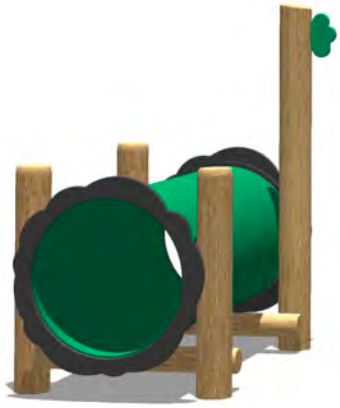
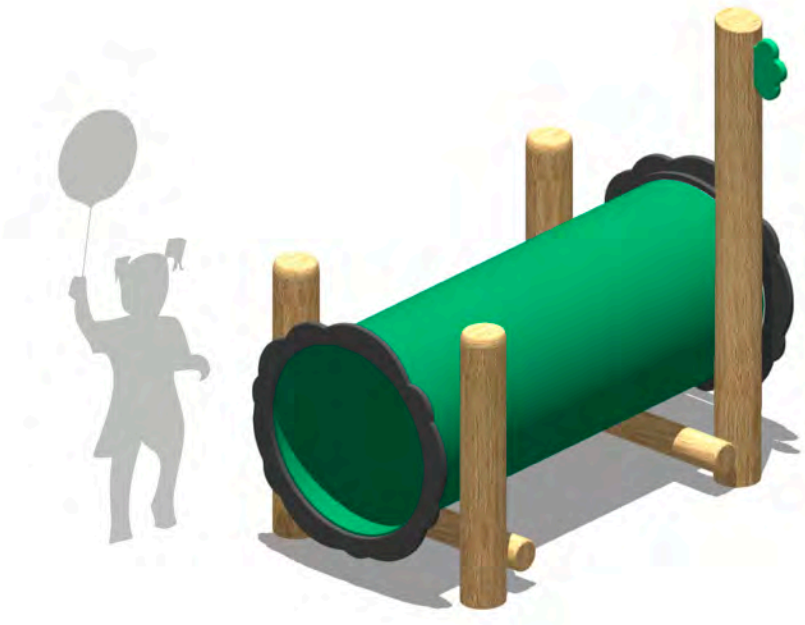
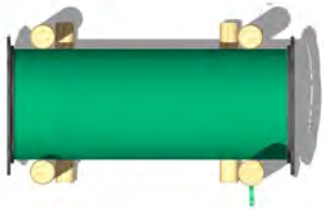
The supporting structure is made of Robinia wood with trunks measuring 12 -14 cm in diameter. The tunnel has a diameter of 60 cm and is made of recycled and recyclable non-toxic material. The height of the lower part of the tunnel is placed 20 cm from the ground while the lower part is placed 80 cm from the ground.





Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

Inclusive play:
This inclusive tunnel is functional for use by children with all abilities. The height of the tunnel entrance, placed at 20 cm, is also suitable for users with limited motor skills.



Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.

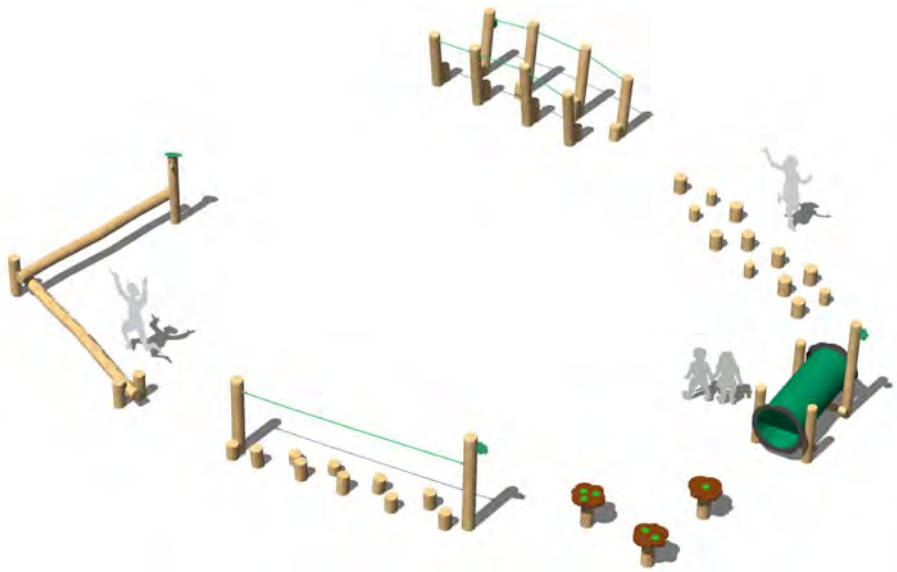
Art. 011330 ADVENTURE TRAIL

lungh. 30 metri	lungh 33 m m	10	3-12	H. C. 40

System for recreational motor activities which is made up of various balance and skill tools combined in an adventurous journey.
System for recreational motor activities which is made up of various balance and skill tools combined in an adventurous journey. Some tools are simplified and also suitable for users with reduced skills. It is made of Robinia wood, trunks with a medium diameter of Ø 14-16 cm, hand-crafted maintaining their irregular profile for optimal inclusion in a natural environment such as that of green areas. The tool allows children to experiment with movement on different difficulties and includes: passages over logs, tunnels and boards at various difficulties. The final trunk includes a "little man" shape which acts as a stimulus for achieving the objective at the end of the path. It must be fixed to the ground using concrete foundations. The arrangement of the tools can be defined as desired in order to adapt the system to the available space. The tools that make up the route can also be purchased individually to create an Adventure Trail as you like.



Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

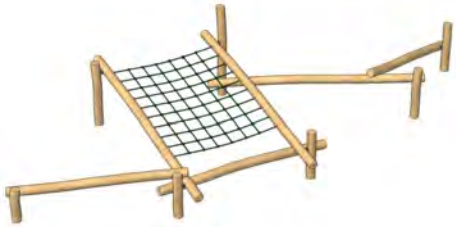
The irregular arrangement allows children to freely interpret the game, encouraging manual skills and the development of balance. The large network allows for rest and socialization. The trunks are fixed to each other using a special spacer which avoids the entrapment of laces and body parts. The fixing bars are made of galvanized steel, embedded in the wood without protruding from the structure. The mesh nets are made with colored ropes Ø 16 mm with 6 strands with a metal core. The structure must be fixed to the ground using concrete foundations. We recommend the use of natural anti-trauma surfaces such as sand - gravel – bark.

Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.



Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.

WE WOOD, YOU PLAY

Illustrated Sheet

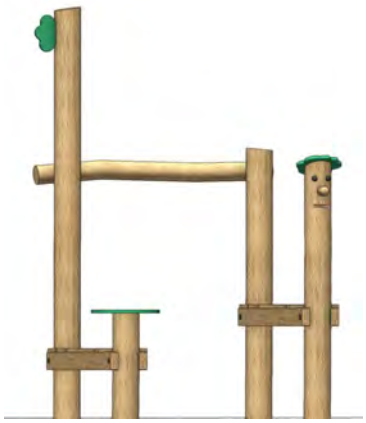
Art. 011021 BABY SOCIAL POINT

145 x 145 h 215 cm	445 x 445	6	2-10	H. C. 0

Robinia wood structure designed to encourage children's play and sociability in an inclusive way, also accessible with wheelchairs.
Robinia wood structure designed to encourage children's play and sociability in an inclusive way, also accessible with wheelchairs. The system is equipped with two benches/seats for role-playing and a small table. The supporting structure of the game is made with Robinia trunks with an irregular diameter of 14-16 cm, one of the uprights includes the figure of a little man who acts as a stimulus and reminder for the meeting point. The structure is also ideal as a workstation for games with sand and water if placed on sand. Accessories for water and sand such as mill, pulley and fountain are available.



Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

Inclusive play:
Having fun together in the same space is the fundamental concept of this inclusive playground. Role-playing games such as shop and theater become the aggregating activity for users with any ability.

Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.

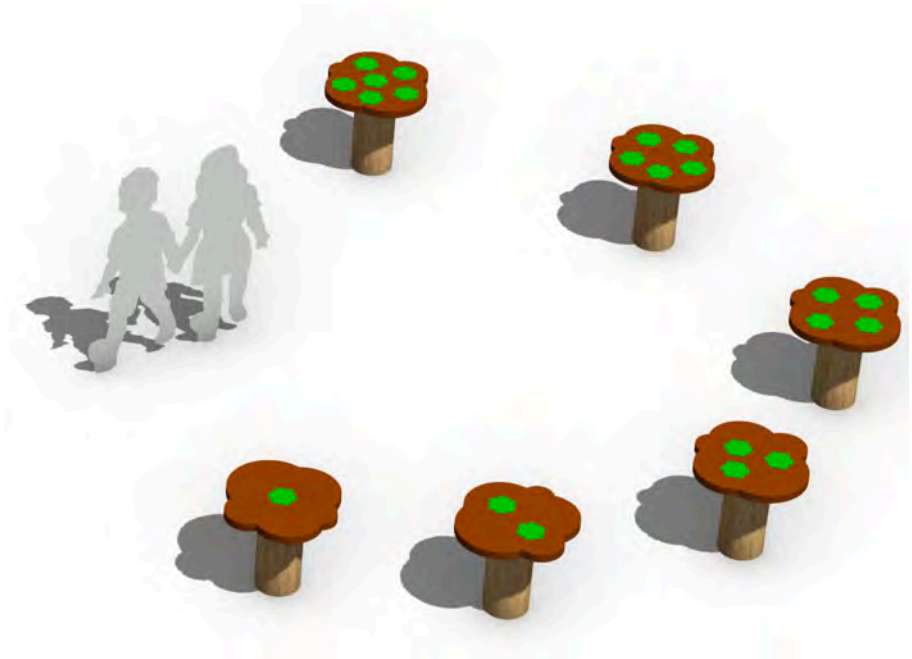
Art. 011334 PERCORSO TATTILE ROBINIA

da 5 metri in su	da 10 mq	6	2-14	H. C. 50

Tactile obstacle course also for the visually impaired consisting of 6 stations. Children are encouraged to reach the last "mushroom", using the stations as a guide. Each station is equipped with colored tactile tiles arranged in relief progressively from number 1 to number 6. This inclusive game allows and encourages use even by able-bodied children who use the game as an obstacle course or as seating. The height of the obstacles from the ground can be defined according to the age of the users. Made of Robinia wood and resin-coated plywood panels for long life. The colored inserts are made with recycled and recyclable polyethylene. The obstacles must be fixed to the ground using a concrete block or metal bracket.



Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.

Inclusive play:
Functional for use by children and teenagers of all abilities. The "mushrooms" can be used all together, as an obstacle course or as tactile supports to reach the final goal.

Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.

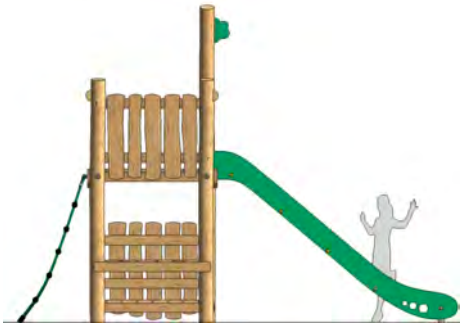
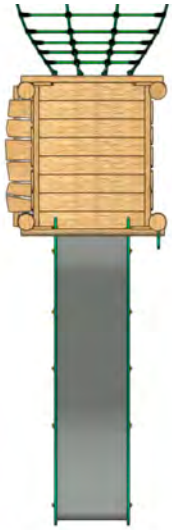
135 x 425 h 350	435 x 777 cm	8	3 - 12	H. C. 150

Play system made of Robinia wood and composed of a multi-function tower that includes multiple activities arranged on the ground and on a raised playing surface 100 cm from the ground.
Access is via a climbing net, the upper floor is protected by sturdy wooden balustrades, the descent is via a recycled and recyclable ecological polyethylene slide, 300 cm long. The raised platforms are made of sturdy Robinia wood beams and 30 mm thick boards. The supporting structure of the game is made of Robinia trunks with an irregular diameter of 14-16 cm.



Built in Robinia wood harvested in a controlled and sustainable way. The wood is debarked, sapwood removed, sanded and worked by hand to create durable and safe equipment, in compliance with UNI-EN-1176.



Being made of natural Robinia, this article may present a superficial cracking over time which does not cause any problems of durability, functionality and safety.
